

Experience

Bioinformatician

South Australian Genomics Centre (SAGC)

August 2020 - Present

Highlights

- Completed and delivered 8 bioinformatics analysis projects over the past 8 months. Feedback from clients included “timely completion”, “detailed documentation”, “transparent and reproducible”, and “well-presented”.
- Drove analysis of a multi-stage 10X single-cell RNA-seq project investigating tissue development over 8 months. Key outcomes included integration of multiple datasets across different organs, deployment of an interactive web app, and characterisation of novel cell populations.
